

Cycle of exhibitions at the Italian Diagnostic Centre – Year 2015

The collaboration with the CDI - Italian Diagnostic Centre as part of the series of exhibitions performed with young artists and hosted by the clinic continues: in 2015 the project generated two exhibition itineraries.

From May to October the exhibition "La regola del talento" (The rule of talent) in collaboration with the Cologni Foundation for art crafts recounted through the beautiful photographs by Laila Pozzo the work of seventeen Italian schools of Alto Artigianato (High Crafts), places where know-how is transmitted to the young masters of tomorrow.

From December 2015 to March 2016, the exhibition "Recondite Armonie. L'arte della bellezza" (Hidden Balances. The Art of Beauty), in collaboration with the collective of young artists MostraMi offers an overview through different ideas of beauty, performed by the creators who all possess very different techniques.

The project of the series of exhibitions in collaboration with the Italian Diagnostic Centre (CDI) was inaugurated in 2010 and aims to give young art students the opportunity to exhibit their creations, and, simultaneously allows the staff and visitors of the Centre the chance to benefit from the cultural experience, firmly believing, supported by scientific proof, that it contributes to the general improvement of the quality of life.
