

Second edition of “Bracco Foundation meets” cycle

A series of four encounters to get close to the theme of Expo Milano 2015: “Feeding the planet, energy for life”, the leitmotiv of the appointments for 2013.

On the stage of the Teatrino in via Cino del Duca the protagonists of the second edition discuss themes that are significant in their approach and relevance: the Mediterranean diet as cultural and gastronomic identity, the urgent question of food waste, and then history, innovation and sustainability in agriculture.

The final appointment will recall the first edition of the cycle, offering an in-depth look at the Milan Waterways project and recounting Leonardo’s magisterial work of canal planning.

A true laboratory of ideas open to the City, to keep us asking questions about our present and so maintain our vigilance on the future.
