

Mind the STEM Gap Together

Having participated in the invitation for tenders for the Region of Lombardy's "TOGETHER" programme, which seeks to provide practical help to young people in difficult situations, Fondazione Bracco was selected to carry forward a project involving young people from all over the region.

With the support of Politecnico di Milano (a third-level institute), the students of several high schools in the region will put on a travelling show and set up a virtual exhibition dedicated to the [Mind the STEM Gap manifesto](#) and the related [Roblox video game](#).

The students will also organize a social media campaign aimed at their peers to promote gender equality in the STEAM subjects (Science, Technology, Engineering, Art, and Mathematics).

The project began on 18 January 2023, and the goal is to involve more than 10,000 young people. Follow the latest developments on our social media channels.
